

Video Self Portrait

Final Cut Skills Test

Due at beginning of next class

Video portrait: The focus of this project is to demonstrate your ability to produce a Final Cut Pro X video using the editing skills you have learned.

1. Using the Apple Photo Booth (available on all recent Macs including the iMacs in the lab), a cell phone, digital camera and or camcorder film a video *self-portrait*.
2. Produce a 30 - 90-second video self portrait edited in Final Cut Pro X that you *will want to put on your Facebook page and a digital resume or portfolio site*.

Note: *Use of copyrighted music and or photographs is not permitted!*

1. Your finished production must include all of the following elements:
 - a. Title screen – for the theme of your video *including your name* with a motion effect for the text
 - b. Video clips of yourself talking
 - c. Voice over of sound bites of yourself talking
 - d. B-roll relevant to your uniqueness and interests
 - e. One or more full screen panned still photographs – relevant to your uniqueness and interests
 - f. At least one cross fade transition
 - g. Music bed created in GarageBand
 - h. Sound effects from GarageBand or from sources provided in class
 - i. If applicable sound bites and or video clips of yourself playing an instrument, dancing, singing, participating in a sport or performance etc.
 - j. Credits screen at end of your video:
